

wMobile 2.1 enables users to have live web based access to a GoldMine® based CRM system using their desktop web browser or mobile telephone.

FEATURES

Interface

wMobile has a web based user interface that mirrors the GoldMine Premium user experience. On a laptop or desktop computer, PC or Mac, users can connect live through a web browser. On a mobile phone a simplified user interface presents information and functionality on the smaller screens of mobile devices.

Contacts

It is quick, easy and secure to find, edit and add contacts and related information. wMobile supports GoldMine Premium systems users switching between contact sets. Both Phone and Desktop Editions support GoldMine functionality such as GoldMine Relationship Trees, contact groups, filters, detail records and customized field screens. User access to GoldMine records can be easily restricted by applying simple security filters.

Google & LinkedIn

With dedicated Google and LinkedIn Tabs, wMobile lets you access Google satellite maps, directions, blog or web searches for the currently viewed contact or check if the current contact is in your LinkedIn network.

Phone & Email

wMobile interacts with your mobile phone allowing you to quickly phone and email contacts. wMobile can be configured to automatically link email sent to and received from contacts to their GoldMine Premium CRM history. Remote users can send and receive email without plug-ins or any user action to add the email to the contact history.

Maps & Directions

wMobile displays your contacts location on a map, generates turn-by-turn directions to the contact and shows which contacts are in proximity to the contact. Proximity search is available with a GeoCoding option.

Document Management

wMobile enables remote users to remotely retrieve any document stored on a central server and linked to GoldMine. Documents can be sent to any contact via email.

Users can quickly look up key contact information as well as detailed CRM information

Users can view maps of contact location and get turn by turn directions

Sales & Marketing

wMobile allows you to manage sales forecasts and opportunities on both the desktop and mobile phone. wMobile users can attach automated marketing process tracks to contacts allowing the automation of marketing and administrative tasks.

Calendar & Activities

wMobile allows you to review, update, add and complete activities with immediate update of your GoldMine database. You can schedule and review activities for GoldMine team members on an intuitive graphical calendar.

Installation & Configuration

wMobile requires no remote installation. Your wMobile users are up and running in seconds just by adding a new web address to the web browser. wMobile automatically inherits configuration from your GoldMine system.

High Performance & Scalable Technology

wMobile Phone and Desktop Edition will scale to support 100's of users on a single server. wMobile's lightweight web clients support worldwide access to GoldMine from a single web server location.

License

wMobile is an inexpensive one time purchase giving you a perpetual license to web enable your remote CRM users.

Supported Browsers & Phone Devices

wMobile supports all phone devices such as Blackberry®, iPhone, iPad, Google Android® and Windows Mobile® as well as all worldwide mobile phone carriers and systems with internet data service. wMobile supports desktop web browsers such as Internet Explorer, Safari, Firefox or Google Chrome.
